How to Attempt?

All Digits Count

Write a function to find the count of ALL digits in a given number N. The number will be passed to the function as an input parameter of type int.

Assumption: The input number will be a positive integer number >= 1 and <= 25000.

For e.g.
If the given number is 292, the function should return 3 because there are 3 digits in this number
If the given number is 1015, the function should return 4 because there are 4 digits in this number

JAVA7

Compiler: Java - 1.7

```
1  import java.io.*;
2  import  java.util.*;
3
4  // Read only region start
5  class UserMainCode
6  {
7
8      public int allDigitsCount(int input1){
9          // Read only region end
10         // Write code here...
11
12    String str=Integer.toString(input1);
13    return str.length();
14     }
15 }
```
